Dear Derralynn

Many thanks for your email and apologies for the delayed response but my clinical commitments keep me busy.

I am very pleased that the charity considers support for our study.

I'd like to confirm that we are keen to go ahead with the project.

We are finalising our protocol and in fact the final meeting regarding this is planned for 19th May. We have also done some of the background work to make sure that our research Lead is happy for us to do this project and to find out how we can get access to the notes (those are contaminated ones and are locked for two weeks after patient's discharge). I have also spoken to Barnet ICU Clinical Lead who would be happy for us to access their notes, however she feels that it may be difficult to identify which patients were on anaesthetic machines.

Hope it answers your questions.

BW

Dear Agnieszka

Further to our application to RF charity to support RF initiated covid-19 research they have indicated that they are willing to support us to cover a number of the projects we submitted.

For your project we just submitted a cost of 4500

I am waiting for a letter from the charity about the terms however broadly we suggested the following milestones:

Milestone administered for each WP		Funding
1	Protocol completion and approvals in place	25%
2	First patient enrolled	25%
3	Last patient enrolled	25%
4	Peer reviewed publication	25%

In readiness of receipt of the letter with terms from the charity could (1) Confirm that you wish to go ahead (2) current milestone

Many thanks with all of your help in getting this far

Best wishes

Derralynn
